

Django Developer

afarax is looking for a freelance **Django Developer**. We need you!

The project:

Our client in the banking sector is looking for a **Django Developer** to join their team.

As part of the team, the dev engineer commits to help the team to deliver value at the end of each sprint. This is achieved by interacting with out stakeholders and translating their needs into solutions that integrate in the IT fabric of the bank. The focus is on the completion of the team's backlog in the order that has been agreed between the various stakeholders and the Product Owner based the added value for the (internal or external) client.

The dev engineer adheres to the scrum values (focused, committed, open, respectful, and courageous) and is able to closely collaborate with the team members. Knowledge sharing, open communication, continuous learning and commitment to deliver added value are key.

Is this you?

- Fluent in English and active knowledge of at least one local language + passive knowledge of the other language
 - A degree in computer science is preferred
 - Any certification in Python, programming, Linux system administration or networking is a plus
 - At least 5 years of relevant experience
 - Strong experience in Django
 - experience in software engineering in Python
 - Git (version control system)
 - Experience in MLOps or DevOps
 - experience with testing frameworks (Gherkin, Behave)
 - Polyglot (knowledge of other programming languages)
 - Knowledge of agile methodology
-
- Team player, our success and failures belong to the team
 - Pro-active attitude
 - Result driven
 - Good Communication and Influencing skills
 - Good analytical and synthesis skills
 - Autonomy, commitment and perseverance
 - Ability to work in a dynamic and multi-cultural environment
 - Promote continuous improvement (market evolutions, working methods, ...)

How afarax supports you?
