# Data Engineer

Data engineers contribute by building scalable data pipelines and cloud infrastructure using a dynamic and cutting-edge tech stack 

[Join us](#)

## Your challenge

*Exciting developments are happening, offering opportunities for businesses to innovate and gain a competitive edge. Now is the time to join us and leverage those technical skills to create real impact together with a cross functional team on the most innovative projects for clients across Europe such as Randstad, ASML, FUNKE, and many more!*

*Whether it's about leveraging the latest multi-agent frameworks for product innovation, building data lakes on cloud platforms to improve storage or implementing  AI. You can find it all at ML6.*

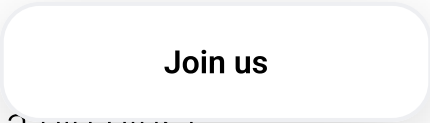

[Join us](#)

As a Data Engineer, you'll contribute to this by **building scalable data pipelines and cloud infrastructure** using a dynamic and cutting-edge tech stack.

- Be a true consultant and efficiently translate customer business needs into end-to-end technical (data/ML) solutions and effectively communicate them to business stakeholders
- Keep up with and apply state of the art research
- Conceptualize, design and implement data and cloud architecture
- Build and deploy batch and streaming data pipelines
- Build and deploy production ready applications on Cloud
- Collaborate with internal and external stakeholders like: Software Engineers, Project Managers, and clients
- Work with a wide range of technologies, such as:

GCP, Azure or/and AWS, Python, Kubernetes, Dataflow / Apache Beam, Terraform, Flask / Connexion, BigQuery, DBT, ...

## Why you?

- A bachelor's or master's degree in computer science or a related field
- 2+ years of professional experience as a data, software or ML engineer **or** an ambitious young graduate with a passion for data
- Excellent verbal and  skills in English (German/Dutch are a big plus)

- Worked extensively with Python, SQL and Git
- Experience with cloud based solutions is a plus
- A talent for communicating results clearly and effectively, also to non-technical stakeholders
- A consultant mindset and passionate about technology
- Flexible, curious and willing to embrace change for the better
- Familiar with AI/Machine Learning
- Experience in one of our focus domains is a plus: GenAI, Bio, Ops, Energy or Digital Twins

## Why ML6?

Looking for a dynamic environment where you can create real business impact with AI? Look no further. Don't expect a big corporate organisation with pre-defined jobroles and plans for the coming years. Expect the unexpected. Growth, change and impact. Expect to work for the most innovative and biggest companies across countries. Expect exponential personal growth in your career.

We aim to be a frontrunner in pay equality/equity. We have a bold vision on fairness, transparency and are impact driven in our way of rewarding. We believe that people should be paid based on their impact they make for the company and not their gender, background or negotiation skills. We provide attractive salary packages for your expertise and an optimised benefits program where we stay true to our caring and learning goals. In a nutshell, we've built a place where we truly love working, we th

## Create intelligence with a lasting positive impact

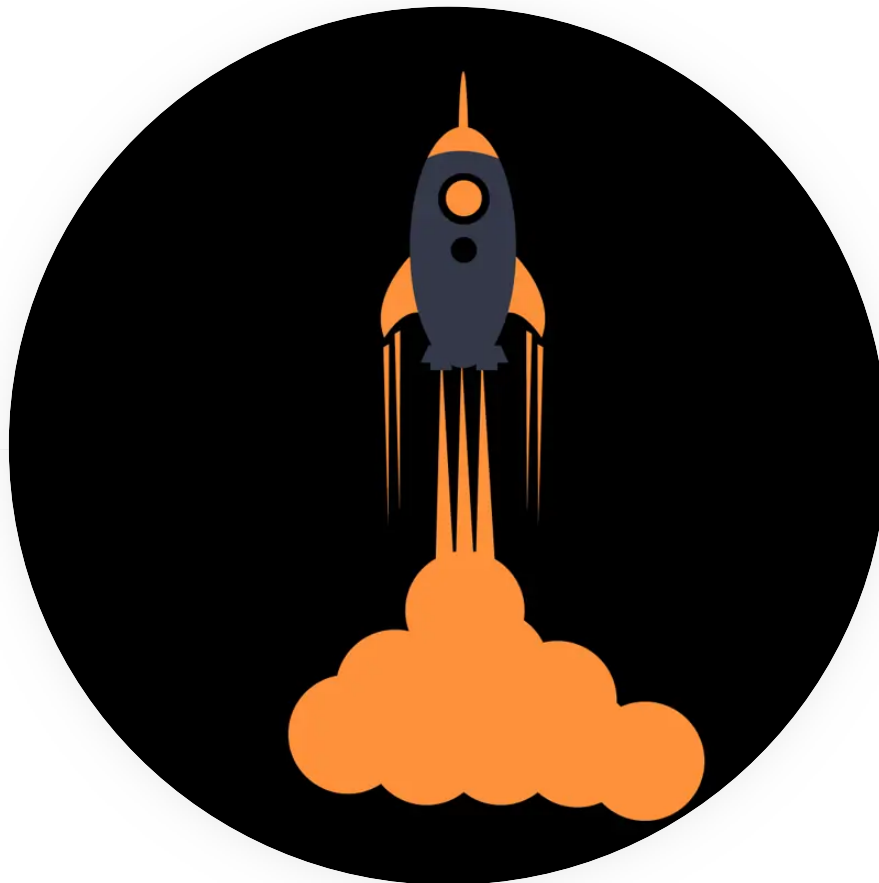

As a leader in AI, we work hard to ensure that AI is designed, developed and deployed to create positive impact. We take our responsibility to build secure and sustainable technology seriously and have integrated ethics within our way of working. This shows in every **client case** and **do good** projects we do.

## Innovate and share knowledge

**Learning** is part of our DNA. Whether it's through our team's expertise, creating spin-offs or the latest tech breakthrough, our culture will empower you to deliver top-notch AI solutions to our customers. We organise chapter conferences, guest lectures, meet ups, dedicate time to research, blogposts, a personal training catalog and so much more.

## We achieve more together

Expect to build lasting relationships that extend beyond the office walls. Thanks to our collaborative and diverse culture, we achieve the extraordinary. From our **6 Maffia**, we've created a safe environment and open feedback is cherished. To foster our interpersonal connections, we love to see

each other's pretty faces at the office.

### **Fast growing and international**

We're gearing up for our next growth milestone. Don't expect a big corporate organisation with pre-defined job roles and plans for the coming years. Expect the unexpected. Growth, change and impact. Expect to work for the most innovative and biggest companies across countries. Expect exponential personal growth in your career.

### **Byte size Benefits**

Last but not least, we provide an attractive salary package for your expertise and an optimised benefits program where we stay true to our caring and learning goals. In a nutshell, we've built a place where we truly love working, we think you will too.

# About ML6

**We guide the AI revolution towards positive impact.** 🌐

Exciting developments are happening in the world of AI, offering unprecedented opportunities for businesses to innovate and gain a competitive edge. Now more than ever is the time to create intelligence with lasting positive impact. And you can be a part of this!

1. We deliver end-to-end projects where we accompany **organisations** through the entire AI journey
2. We build bespoke hybrid ML **solutions**
3. We **navigate** and set up advisory projects

*As ML6 highly values diversity, inclusion and transparent communication, we've implemented a formal channel to report serious misconduct **here**.*

*Examples of serious misconduct (not limited to): safety of the individual (aggression, discrimination, sexual harassment), data privacy issues, public health, tax and fraud.*
