About the job

Are you an all-round developer with a sound knowledge of Python and are you interested in applying your expertise in Machine Learning projects? We offer you the opportunity to further develop your skills in a conversational ChatBot project.

Responsibilities

- Contribute to a full stack of tools for deploying chatbots in production
- Develop solutions to easily train, build, maintain and monitor the chatbots
- Help stabilise the platform using standard software quality protocols
- Improve and integrate the different components of our ChatBot engine
- Support the Machine Learning engineers and data scientists involved in the project
- Align with all stakeholders to prioritise the correct tasks
- Clearly articulate technical possibilities and limitations to a non-technical audience, and proactively suggest technical improvements
- Have a passion for AI and want to learn more about natural language processing
- Engage and evolve in a large community of data scientists and software engineers who love to automate and innovate the bank
- Share best practices within the team
- Will build next-gen ChatBot with an LLM powered Rag solution (knowledge of LLM-powered applications and experience in prompting, Rag fine tuning and autonomous AI agents is mandatory)

Competences

- A fluency in English and a good knowledge in Dutch or French
- You have a degree in (applied) Informatics, Computer Science, Engineering, Statistics, Mathematics or related field (or equivalent through job experience)
- You have at least 4 years of relevant experience with Python in a production environment
- Experience with an LLM powered Rag solution
- Knowledge of Django (is a plus)
- Data science experience with an NLP/NLU project
- Having experience with Frontend web technologies, APIs, Postgres is considered as a plus
