Large Language Models Specialist

📍 **Ordina Belgium** in **DIEGEM**

🕐 Online sinds **15 dagen** - **Vaste Job**

Functieomschrijving

Ordina is the digital business partner that uses technology and market knowledge to give its customers an edge. We help our customers stay ahead of change through smart digital end-to-end solutions, sustainable software solutions and the design and management of IT landscapes.

Your Impact

We're a rapidly expanding company on the lookout for individuals eager to join us in driving our growth. If you're enthusiastic about Natural Language Processing (NLP) and cutting-edge technologies, we want you on our team to take on thrilling projects centered around NLP techniques and Large Language Models (LLMs).

As an accomplished Data Scientist specializing in NLP and LLMs, you'll be at the forefront of developing and implementing advanced NLP solutions. Your role will involve bridging the gap between emerging technologies and business needs, all while offering guidance and mentorship to colleagues and clients in your areas of expertise.

Do you possess innovative ideas to join our Data Science team in delivering data-driven solutions to our customers, leveraging the most recent machine learning models and deep learning algorithms? Come join us as we embark on this exhilarating journey of growth and technological advancement.

Where you're going to get started

As a Data Scientist, you will dive into the world of artificial intelligence. You will apply your skills to real scenarios and in different domains, such as drug discovery in healthcare, building RAG-based LLM-applications and more.
