

To: Hiring Team Vlaanderen Connect

Dear Hiring Team at Vlaanderen Connect,

I'm writing to proactively express my strong interest in contributing to Vlaanderen Connect. Your focused work supporting government departments genuinely excites me, aligning perfectly with my core motivation to engage in work with purpose, impact, and a clear contribution to broader social good. This isn't a fleeting interest, I previously applied for Data Engineer, a few months ago, and while I did not get an invitation for that particular role, my conviction about the value of Vlaanderen Connect's mission has only solidified since.

What draws me specifically to Vlaanderen Connect is the chance to apply this drive within the public sector context. The prospect of tackling diverse challenges across different government entities, helping to improve processes or citizen services, directly speaks to my desire for truly impactful work. It's this unique intersection of consultancy and public service that I find so compelling.

From my perspective, I thrive when I can step into a situation, leverage my expertise to help define and build effective solutions. This dynamic, often found in consultancy, feels like a natural fit for my working style. My technical foundation is versatile, covering areas from software development, DevOps practices, LLM's, Data/AI engineering.

However, these technical skills are fundamentally tools. For me, the key motivator isn't the specific technology, but the purpose it serves. The opportunity to use these skills to contribute to projects benefiting the wider community, like those Vlaanderen Connect undertakes, is what truly energizes me. This focus on the mission over the specific tech resonates with the kind of impactful work Vlaanderen Connect is known for.

My enthusiasm for Vlaanderen Connect's mission and approach is genuine, and I'm confident I could bring value to your team and your clients. Even if there isn't an immediate opening that perfectly aligns with my profile right now, I would be very keen to discuss potential future opportunities and explore how my blend of technical versatility and purpose-driven motivation could fit within your organization.

Would you be open to a brief introductory conversation sometime in the coming weeks?

Thank you for considering my spontaneous application.

Sincerely,

Gerrit Geeraerts
