SOFT SKILLS

- Curiosity
- Innovative & Creative
- Communication
- Problem solving
- Team Player
- Analytical & Strategic
- Quick Learner
- Teaching
- INTP (Logician)

Languages

- Dutch +++
- English +++
- French ++

EDUCATION

Professional Bachelor

KaHo Sint-Lieven, Ghent
2005 - 2008

Industrial Sciences

Don Bosco, Halle
1999 - 2005

PROFILE

I'm a curious and creative tech professional who loves building things. I enjoy digging deep to find the real problem and then creating flexible, hands-on solutions. My strength is bridging the gap between complex technology and the people who use it. I'm driven by purposeful work where I can combine my passion for data and cloud technologies with teamwork to make a real impact.

Tech Skills

AWS Azure Airflow DevOps Docker CI/CD Kubernetes ML(Ops)
MLflow Terraform CatBoost ETL LLM (NLP) Matplotlib Numpy
Pandas Scikit-Learn Spark LangChain LangGraph LangSmith RAG
Ragas Bash Powershell Python SQL HTML CSS Django FastAPI
Scrapy Selenium Streamlit Elasticsearch Neo4j SQL
Active Directory Linux DHCP, DNS, Firewall, iOS Proxmox
Windows Server Agile Confluence GIT IoT Jira Power BI Teaching

WORK EXPERIENCE

Data Engineer *Cronos (SUMSUM) & Bencode* 03 - 12/2024

Completed an intensive, full-time AI program focused on practical skills. During my three-month internship, I dove into Generative AI, building two functional MVP's. This included a collaborative multi-agent system to automate project reporting and a RAG chatbot that let clients interact with their own business data—both built on AWS with Python and LangChain.

Cloud & Automation Engineer *VGC* 2019-2023

I led the full migration of a fragmented, on-prem infrastructure to a unified Azure Cloud solution. This wasn't just a technical lift; it was about redesigning the foundation to be simpler, more secure, and easier for everyone to use. A key part of my role was hands-on automation with Python and PowerShell. For example, I designed and built a Python-based user management tool to cut down on manual work during hectic school start-ups. I also focused heavily on the human side—coaching colleagues and training teachers to ensure the new systems were adopted and actually improved their daily work.

IT Systems Engineer *Metro Group* 2014 - 2018

I started with hands-on IT support for our stores but quickly took on more responsibility. I proactively joined the central network team, managing Cisco hardware and also became a key technical person in the user team, where I used PowerShell to automate user accounts and improve security. A big part of my job was coaching employees to become more self-reliant with technology, turning resistance into confidence.

Sales Digital World *Metro Group* 2011 - 2014

Sales role focused on creating a great customer experience.

Textile Department IT Lead *Universiteit Gent* 2009 - 2010

As the sole IT lead for the department, I handled everything from daily support to strategic projects. I led the complete modernization of our outdated IT infrastructure and developed a custom workflow tool, taking the project from initial concept to a successful launch.

PROJECTS & VOLUNTEERING

Volunteered at Viso Cor Mariae

2024

I helped this school in need, Analyze there IT infrastructure, create roadmap, start on implementing and find train and startup a permanent successor.

Home lab

I have a home-lab where I actively experiment and test out technologies as it is my main hobby I spend a lot of time here.
