About the job

🚀 Software Engineer - AI Solutions at WonkaAI

At WonkaAI, we specialize in crafting bespoke AI solutions that empower businesses to harness the full potential of their data. Our expertise lies in developing and deploying scalable, cutting-edge applications that enhance efficiency, provide actionable insights, and enable adaptability in an ever-evolving technological landscape.

Position Overview:

We are seeking a skilled **Software Engineer** to join our dynamic team. In this role, you will be instrumental in designing, building, and deploying software systems that integrate **Agent, Multi-Agent, and Retrieval-Augmented Generation (RAG)** frameworks. Your contributions will directly impact the operational efficiency of Belgian companies through customized AI multi-agent solutions.

Key Responsibilities:

- 🌟 Design and develop **Proof of Concepts (PoCs)** for innovative AI-driven applications.
- 🚀 Transform PoCs into **robust, production-grade systems**.
- 🔧 Maintain and enhance our **proprietary in-house solutions**.
- 🤝 Collaborate with cross-functional teams to understand client requirements and deliver tailored solutions.
- 📰 Stay abreast of the latest advancements in **AI and multi-agent systems** to inform development strategies.

Qualifications:

- 💻 Proficiency in **Python programming** and a solid understanding of common programming paradigms.
- 🔧 Experience in creating, maintaining, and implementing extensions of **RESTful APIs**.
- 📊 Hands-on experience with relational databases, particularly **PostgreSQL**, and associated tools like **SQLAlchemy**.
- 🧠 In-depth knowledge of **data structures and algorithms** for efficient problem-solving.
- 🔄 Experience with **version control systems** such as **Git**, including familiarity with branching strategies and code review practices.
- ☁️ Familiarity with **cloud infrastructure**, especially **Azure**, and experience in deploying and managing applications in cloud environments.
- ⚙️ Understanding of **DevOps practices, CI/CD pipelines**, and proficiency with automation tools to streamline the software development lifecycle.

with **automation tools** to streamline the software development lifecycle.

- 🧠 Experience with **Generative AI (GenAI)**.
- 🔍 Strong **analytical mindset**, coupled with excellent problem-solving and debugging skills.
- 🗣️ Effective **communication and collaboration abilities**.
- 🌐 **Fluency in English** is essential; proficiency in **Dutch** or **French** is a plus.
- 🕒 A minimum of **3 years** of professional experience in back-end development.

If you are passionate about leveraging AI to solve complex business challenges and are eager to contribute to the success of leading companies in Belgium, we would love to hear from you!

The Wonka Family:

At Wonka, we don't just grow businesses; we grow people, too. Since our creation, our goal has been to create a **fast-paced, creative, and open environment** where each team member can contribute to our journey and benefit from our success. We value **autonomy, collaboration, and innovation**—three pillars that guide everything we do.

What You Can Expect:

- 🚀 **Impactful Work:** Your contributions will directly shape our growth (did we mention we're aiming to double our revenue in the next few months? 🚀).
- 🤝 **A Supportive Team:** Collaboration is at the heart of what we do. You'll work with brilliant and enthusiastic colleagues on cutting-edge projects.
- 💡 **Freedom to Innovate:** Got an idea? Let's try it. We give you the space and resources to experiment and push boundaries.
- 📈 **Opportunities to Grow:** As we grow, so do you. Whether it's learning new technologies or tackling new challenges, we're committed to your professional development.

And don't worry, work shouldn't just be about work! We believe in creating a **fun and balanced environment** where well-being is just as important as success.

☀️ Join us at WonkaAI, where we innovate, grow, and have fun together!
