- French ++

EDUCATION

Professional Bachelor

KaHo Sint-Lieven, Ghent
2005 - 2008

Industrial Sciences

Don Bosco, Halle
1999 - 2005

PROFILE

I'm a curious and creative professional with a broad range of interests and a passion for technology. I enjoy exploring new technologies just as much as connecting with people, whether customers or colleagues, by exchanging ideas and learning together.

I naturally think outside the box and like to dig deep to understand the core of a problem. My strength lies in combining critical thinking with hands-on work, building flexible, modular solutions that can grow as needs change.

I work best in a hybrid setting: focused tasks at home, collaborative ones on-site. Above all, I'm driven by meaningful work where curiosity, creativity, research, and teamwork come together to make a real impact.

Tech Skills

AWS Azure Airflow DevOps Docker CI/CD Kubernetes ML(Ops)
MLflow Terraform CatBoost ETL LLM (NLP) Matplotlib Numpy
Pandas Seaborn Scikit-Learn Spark LangChain LangGraph LangSmith
RAG Ragas Bash Powershell Python SQL HTML CSS Django
FastAPI Scrapy Selenium Streamlit Elasticsearch Neo4j SQL
Active Directory Linux DHCP, DNS, Firewall, iOS Proxmox Windows Server

WORK EXPERIENCE

Data Engineer

Cronos (SUMSUM) & Bencode

03 - 12/2024

A project-based AI specialization focused on delivering end-to-end, data-driven solutions.

Internship projects:

LLM Reporting Tool: Developed a tool using collaborative LLM agents (RAG, LangGraph) to transform unstructured data into visual reports (NLP, AWS, Elasticsearch).

RAG Chatbot: Created an AI-powered collaboration platform during a 3-month internship, designed to unlock internal knowledge through a conversational interface.

Developer / System Engineer

VGC

2019-2023

Proactively bridged the gap between IT infrastructure and business needs, with a focus on user-friendliness, security, and automation.

Initiator & Project Lead for Cloud Migration: Analyzed the existing on-prem infrastructure and led the full migration to a unified Azure cloud solution, resulting in a lower maintenance and improved security.

Technical Lead for 'Digisprong': Lead the technical implementation and change management to create an inclusive digital learning environment. Successfully overcame user resistance and ensured broad adoption.

Lead and Developer for User Sync & Install Platform: Designed and developed a tool to automate user onboarding and software installation, significantly increasing operational efficiency.

Developer / System Engineer

Metro Group

2014 - 2018

Evolved from an IT support role to a proactive position in national network and systems administration. Developed automation scripts (Powershell, SQL) to enhance the user experience and took the lead on projects related to data security (backups) and user access policies (GDPR).

Sales Digital World

Metro Group

2011 - 2014

Sales role focused on creating a great customer experience.

Developer / System Engineer

Universiteit Gent

2009 - 2010

Evolved from an IT support role to a proactive position in national network and systems administration. Developed automation scripts (Powershell, SQL) to enhance the user experience and took the lead on projects related to data security (backups) and user access policies (GDPR).

PROJECTS & VOLUNTEERING

Volunteered at Viso Cor Mariae

2024

Developed a custom workflow tool to streamline internal processes and maintained the IT infrastructure for the textile department.

Home lab

I have a home-lab where I actively experiment and test out technologies as it is my main hobby I spend a lot of time here.
